

NORTHWESTERN OHIO NORMAL SCHOOL.
ADA - HARDIN CO. OHIO.

ANNUAL
CATALOGUE

OF THE
TEACHERS AND STUDENTS

OF THE
NORTH-WESTERN OHIO NORMAL SCHOOL,
AND BUSINESS COLLEGE,

FOR THE
SCHOOL YEAR 1881-82,
AND
ANNOUNCEMENTS FOR 1882-83.

FACULTY AND PROPRIETORS.

H. S. LEHR, A. M., PRESIDENT. J. G. PARK, A. M., VICE PRESIDENT.
FRED. MAGLOTT, A. M. U. G. STRINGFELLOW, M. S.
H. E. NEFF, B. S.

H. S. LEHR, Treasurer. J. G. PARK, Secretary.
MRS. IDA A. HAMPTON, Librarian.

ANNOUNCEMENTS.

CALENDAR FOR 1882-83.

FIRST FALL TERM, of Ten Weeks, begins Tuesday, August 8th, 1882, and closes October 13th. No vacation.

SECOND FALL TERM, of Ten Weeks, begins Tuesday, October 17th, 1882, closes December 22. Vacation of one week.

WINTER TERM, of Ten Weeks, begins January 2nd, 1883, closes March 9th. No vacation.

SPRING TERM, of Eleven Weeks, begins Tuesday, March 13th, 1883, closes May 24th. No vacation.

THE REVIEW TERM, of Six Weeks, begins Tuesday, May 20th, 1883, closes July 3rd. No vacation.

THE INSTITUTE AND REVIEW TERM, of Four Weeks, begins Monday, July 9th, closes August 3rd, 1883.

At the close of the Six Weeks Term, there will be a nominal vacation of four weeks; but as many students wish to remain and continue their work, and many desire to enter about the first of July, to review and prepare for their year's work, we employ an efficient corps of teachers for the "Institute or Vacation Term," as it is styled. Most of our regular teachers take a vacation; but competent teachers are employed to fill their places. None who wish to enter either for review or general work, need fear that the accommodations will not be complete in every respect. The Vacation Term, of Four Weeks, begins Monday, July 9th, and closes August 3d, 1883.

The next School Year will begin Tuesday, August 7th, 1883.

PUBLIC OCCASIONS.

On Tuesday evening, May 22, 1883, the Alumni of the Institution will hold their Triennial Reunion.

The Annual Adelpian Entertainment will be given on the evening of May 4, 1883.

Commencement exercises Wednesday and Thursday May 23, and 24, 1883.

Triennial Reunion of the Adelpian Literary Society will take place on the afternoon and evening of Wednesday, May 23. In the afternoon there will be a private reunion of the members of the Society; in the evening there will be a public entertainment.

The Annual Contest between the Franklin and Philomathean Literary Societies will be on the evening of May 24, 1883.

INSTRUCTORS*EMPLOYED FOR THE NEXT SCHOOL YEAR.***H. S. LEHR, A. M.:**

Theory and Practice of Teaching, School Government, General History and Political Economy.

J. G. PARK, A. M.:

English Grammar and Analysis, Logic, Greek and Surveying and Engineering.

FREDERICK MAGLOTT, A. M.:

Geography, Arithmetic, German, Latin and Greek.

MRS. EVA MAGLOTT, A. M.:

Mathematics, Latin, Letter-Writing and Composition.

M. JAY EWING, M. S.:

The Natural Sciences.

L. M. SNIFF, A. M.:

Mathematics and Botany.

MRS. L. M. SNIFF:

Preceptress of Female Department.

C. B. HICKERNELL, A. B.:

Latin, Greek and Parliamentary Law.

MRS. MOLLIE HICKERNELL, A. M.:

Rhetoric, English Literature, Latin and French.

F. V. IRISH, A. B.:

Arithmetic, Grammar, Orthography, Word Analysis and Latin.

MRS. REGINA M. DIXON, B. S.:

Assistant Teacher of Mathematics.

W. D. WOODARD:

Book-Keeping and Commercial Law.

J. H. BALDWIN:

Plain and Ornamental Penmanship.

GERTRUDE FRYETT:

Painting and Drawing.

J. C. HOLLAND:

Architecture.

C. E. ROWLEY:

Elocution and Voice Culture.

MRS. C. E. ROWLEY:

Piano and Organ.

J. J. JELLEY:

Vocal Music, Harmony, Organ, and Director of Chorus.

F. R. WEBB:

Piano and Organ.

B. S. YOUNG:

Orchestra.

S. S. HAMILL:

Special Teacher of Elocution.

P. W. REAM,

Telegraphy.

THE LECTURERS:

Will be the best in the field.

The following able Instructors have been employed to
teach during the summer months:

HON. J. J. BURNS,.....	Chillicothe, O.	SUPT. C. W. BUTLER,.....	Plymouth, O.
SUPT. G. W. WALKER,.....	Lima, O.	SUPT. D. E. NIVER,.....	Nevada, O.
SUPT. J. W. ZELLER,.....	Findlay, O.		

EXPENSES.**TUITION.****COMMON ENGLISH BRANCHES—**

Orthography, Elocution, Descriptive Geography, English Grammar, Mental and Practical Arithmetic, for Fall, Winter, or Spring Term.....\$7.00

HIGHER BRANCHES—

Analysis of Sentences, Physical Geography, Higher Arithmetic, Latin, Greek, Modern Languages, Higher Mathematics, Natural Sciences, Vocal Music, Business Penmanship, Drawing, &c., Fall, Winter, or Spring Term.....\$8.00
Normal Term, Six Weeks.....5.00
Vacation Term of Four Weeks.....4.00

MUSIC—Term of Ten Weeks.

Piano, Organ, Violin, Flute, Cornet, Guitar, or any other instrument, two lessons per week.....\$12.00
One lesson per week.....8.00
When taught in classes of four, two lessons per week.....10.00
One lesson per week.....7.00
Classes of six, two lessons per week.....8.00
Classes of six, one lesson per week.....5.00
Harmony, in classes reciting every day.....8.00
Voice Culture, two lessons per week.....12.00
Use of piano, one hour a day for the term.....2.50
Use of organ, one hour a day for the term.....1.80
For longer time the charges will be at the same rate, both for piano and organ.

FINE ART—

Pencil Drawing, 50 lessons.....\$3.00
Crayon, 30 lessons.....5.00
Water Colors, 30 lessons.....5.00
Oil Painting, Landscape, 30 lessons of 4 hours each.....10.00
Oil Painting, Portrait, 0 lessons of hours each.....12.00
India Ink, 30 lessons.....5.00

STENOGRAPHY—

50 lessons of one hour each.....\$5.00

TELEGRAPHY—

Complete Course.....\$30.00
Complete Course including Office Practice.....45.00

PENMANSHIP—

Ornamental Penmanship, per month, 2 hours per day, private lessons.....\$5.00
Full course in plain and ornamental Penmanship.....20.00

Each term there will be four classes in penmanship to which all Literary students are admitted free of charge. Any others wishing to enter those classes must pay \$3.00 per term.

RUDIMENTAL—

The class in Vocal Music called Rudimental is free to all Literary students; but those who are studying music only will be charged \$2.00 per term. All others will be charged \$3.00.

DRAWING—

All Literary students are admitted to the Drawing class free of charge; all others will be charged \$3.00 per term.

All tuition must be settled *invariably in advance*. Any one entering for five weeks or less will be charged \$1.00 per week. No tuition refunded except in case of protracted sickness. Any student leaving on account of business only, gets a receipt for the unexpired time. Incurable students that are expelled will not have any money refunded.

OUR "YEAR PLAN."

Any one by paying \$119 in advance, can attend the entire school year of 51 weeks, and have furnished tuition, good board, and a neatly furnished room, well cared for.

FOR \$110 PAID IN ADVANCE,

The same will be furnished for 47 weeks. This does not include what is known as the Vacation Term of four weeks.

Tuition, board and room-rent will be furnished the First Fall, Second Fall, Winter and Spring Terms (47 weeks) for \$100, paid in advance.

BY THE TERM.

\$28 paid in advance will pay board, room-rent and tuition for a term of ten weeks. The Spring Term consists of eleven weeks and will cost \$30. The room will be furnished and cared for. Two persons occupy one room. These offers go into effect May 30th, 1882.

Our rooms are well furnished with carpets, bedding, towels, etc., in fact every thing needful. You need bring no extra bedding. *Light and fuel extra.*

BY THE WEEK.

There are many who prefer to pay their board by the week and room-rent by the month. Their expenses will be—

Good Club Board, per week,	\$1.50 to \$1.75
Room-rent, two persons in one room, per week,	35c. to 75c.
Light and fuel, per week,	05c. to 20c.
Tuition, per week,	70c. to 80c.
Total, per week,	— — \$2.60 to \$3.60

By self-boarding, the above expenses can be greatly reduced. Good board, in private families, everything furnished costs from \$2.50 to \$3.00 per week.

For instrumental music, painting, telegraphy, and short hand writing, extra tuition will be charged.

Ada is a *school town* and a majority of the families are engaged in boarding and rooming students, and this is why expenses are so low. The competition is sharp, hence prices are low and board good. We could furnish board at \$1.00 per week, as is advertised at some institutions, but we prefer to charge enough so as to furnish good wholesome food. Food must be nutritious to supply brain nutriment. Further, we furnish napkins for the tables, and our rooms are carpeted, towels are furnished, and all the bedding is supplied that may be needed. Students must remember that when these incidentals must be furnished by themselves, if they neglect to bring them along, they must pay what is asked when no price is named in the printed matter. Again, we do not only supply all these things, but keep them clean and in good order. Where students furnish them, they must also pay for the washing. These extras frequently cost more than the published price list.

Please compare the above estimates with those of other similar institutions. As to buildings, recitation rooms, society halls, furniture, libraries, apparatus, and efficient, live teachers, the advantages are equal, if not greater, than those of any similar institution in the West. Our students are our best advertisements. Ninety-nine per cent. of those who once attend, if they continue in school, return again. Every term has from 15 to 25 per cent. increase over any corresponding term, and the last year the increase has been 39%, or 39½ per cent.

If matters are not as represented in our catalogues and circulars, or if, after a fair trial, you are not satisfied with the work of the school, we will refund your tuition.

REMARKS

On the Several Courses of Study in the Literary Department.

The mind of man is, without doubt, the noblest work of God. And as God has created all things subject to law and order, we must not expect to find the mind an exception to the general plan. It has its laws of development; and unless these are followed, its growth will not be rapid, but it will be retarded in its progress and sometimes stunted and dwarfed.

The curriculum in each of the preceding courses is arranged with a view to follow the natural development of the mind, and also to have those studies, on which others depend, to precede, so as to open the way and prepare the student for what is to follow. It may appear to some that the time allotted in which to complete the several courses, is too short. We have tried the experiment, and find that those who work with a will have ample time to complete them well. Many have a tolerably fair knowledge of the common branches when they first enter school, and need not spend so much time reviewing the same as we have allotted for that purpose. Those desiring to complete any of the prescribed courses should follow the order indicated. No one, however, is compelled to follow the course laid out. Some may desire to spend more time in studying the Higher Mathematics and the Languages than we have allotted. All such will be accommodated.

1. From four to eight classes in arithmetic are formed each term; from four to six in English grammar and analysis; from three to five in geography; from four to eight in algebra; from two to four in geometry; two in natural philosophy, chemistry, physiology; classes are also sustained every term in United States history, Latin, Greek, and German grammar, logic, rhetoric, Cicero, Caesar, vocal music, drawing, stenography, several in book-keeping, penmanship, &c. Classes are formed in any other branches if called for by a sufficient number. Having many students and a large corps of teachers, we are enabled to offer these special advantages.

2. Special drills are given each term in elocution, orthography, drawing, letter-writing, debating and parliamentary law, without extra charge.

3. Four years should be allotted to complete the Classical course, and the other courses in the same proportion, by those who commence the Common Branches. Those who have a good knowledge of the Common Branches can take the necessary reviews and can complete all in three years.

4. Those desiring to study French and German as well as Greek and Latin will need one year more to complete the course.

5. German and French may be substituted for Greek and Latin.

6. There can be no possibility of students failing to find suitable classes and studies at any time during the year.

7. Each course of study is *thorough* and *practical*, and sufficient to qualify young ladies and gentlemen for entering upon any business calling or profession in life.

8. Attention is invited to the natural order in which the several studies follow one another in the different courses—a point too frequently overlooked by educators in arranging programs of study.

9. Whenever a sufficient number of persons desire to enter a class in any subject not regularly advertised for that term, their wishes will be recognized.

10. The Common Branches are thoroughly reviewed by those in the Literary Courses, thus enabling students to enter their schools with the *matter* and *manner* of teaching fresh in their minds.

11. Many exercises, such as verbal and written reports, classifications, etc., cannot be exhibited in the Course of Study, and yet they form a part of every day's drill.

12. It is not our purpose to have a stereotyped Course of Study, which, like the laws of the Medes and Persians, shall be unchangeable, but ever to recognize the wants of the progressive age. It is as impossible as it is unwise to attempt to cling to the moorings of the dark ages in deciding what shall and what shall not constitute a liberal Course of Study. The imperative demands of the times must be recognized in both the MATTER and MANNER of teaching.

13. We invite a careful and critical comparison of the foregoing Course of Study with that of any Private, City or State Normal School, or that of any College in the country. While it may not extend over so many branches, or consume so many years, it yet embraces all that is needed in the preparatory work for teaching, the law, medicine, the ministry, or editorial life.

WRITING AND DEBATING EXERCISES.

As the food which is taken into the human system is of no value, nay, is a positive injury, unless it be properly digested, absorbed and incorporated into the various tissues of the structures, so the different studies and exercises of the school will be taken in vain unless they be made a part of the mental fabric, and worked out through the only two possible outlets of knowledge, viz: *written and oral communication*. To meet these demands, *Letter- Writing*, including drills in all that pertains to communications of *Friendship, Recommendations, Notes of Invitation*, together with abundant exercises in capitals, spelling, punctuation, abbreviations, false syntax, and all the common faults and violations of styles, is introduced at the opening of each term.

After one or two terms' drill in this work, *composition* is taught in a free, easy and natural manner. Pupils are taught how to prepare and arrange their thoughts on different questions and topics. Grammar is thus made practical, and the student is drilled in a manner which will tell in his power of expression. Following these drills, comes *Rhetoric*, which gives more extensive practice in the higher departments of literary composition.

In addition to the above drills, all the students are expected to connect themselves with one of the Literary Societies in connection with the Institution. They afford excellent opportunities for practice in declamation, composition, debate and parliamentary law.

Besides the three regular Societies, the students form temporary debating clubs, which afford copious means for practice in forensic disputations.

DEPARTMENTS OF THE SCHOOL.

PREPARATORY.

This is designed to embrace all students who enter the school without having as yet, any particular calling or occupation in view. It receives all who are but moderately acquainted with the simple branches or an ordinary common school education. Its importance can not be easily over estimated, from the fact that the early training of the young gives coloring to the whole after-life.

A great mistake is often made by parents in supposing that because their sons and daughters are quite young, they can learn very much yet in district schools before going to a Normal or High School. In many cases a mass of rubbish is piled up which needs to be torn away before any true education can begin. It is much cheaper and better in the end to send to a good school at first, and have a good foundation laid for all time to come. An education thus begun can be carried on successfully to the end.

Here lies a great difficulty in college instruction. The teaching in the rudimentary branches is usually performed by tutors who are glad to avail themselves of the opportunity to defray their expenses while prosecuting advanced studies. The tutors have never studied the philosophy of teaching, and hence generally do imperfect work. The Normal School, however, recognizing the fact that the foundation of the building must be good and substantial, devotes its best energies to the thorough training of students in the Common Branches, thus laying a good foundation for future acquisition of knowledge.

TEACHERS' COURSE.

The first Course laid down is the Teachers' Course. The work of the Normal School is pre-eminently that of fitting teachers for their work. The curriculum includes all the branches usually taught in Union Schools. Any one who will thoroughly master all the studies prescribed in this Course, will be qualified to take charge of any academy or graded school.

Four grave questions which should engage the attention of every young lady or gentleman who proposes to enter the school-room, are these: *What must I teach? How must I teach? When must I teach? Why must I teach?*

Proper school training for teachers must answer the questions satisfactorily, and enable them to engage in their work understandingly. It is not strange, therefore, that a Heaven-inspired Apostle should say: "Thou therefore which teachest another, teachest thou not thyself."

The aim in this department is:

1.—To furnish a *thorough, practical, fundamental knowledge of the branches studied*, whether for common, graded or high schools.

2.—To give rational *methods of teaching* these branches.

3.—To develop *correct habits of investigation*, and of working up material into a beautiful, symmetrical, spiritual structure.

4.—To give copious exercises which involve the use of *blackboards, globes, apparatus, instruments, blocks, objects*, etc., with a view of enabling teachers to introduce the same into their schools.

5.—To aid in forming *clear and exalted conceptions*, on the dignity and importance of the *teacher's work*, realizing that it is responsible in a great measure for the moulding and assimilating of American character.

6.—To study the science and history of education in general, and to become acquainted with the great system of instruction which now demands the attention of intelligent educators.

7.—To become acquainted with the best educational supplies of the day including text-books, journals, reports, school laws, globes, furniture, etc.

8.—To show how subjects can be taught rather than prescribed text-books; to teach the philosophy of mind-culture; to create a high-toned professional feeling among teachers.

The primary object of this department, is to prepare teachers for their all-important work. In every calling of life, the first requisites to success are, thorough preparation, adaptation and earnestness.

But in no other profession are these elements so essential as in teaching. Especially is this the case in the instruction of children. Here we find no regular train of thought, no appreciation of the value of knowledge, hence no inclination to deal with the abstract. To understand how to instruct these tyros and make them lovers of learning is of no little value. The mind of the child is pliant and easily moulded. First impressions are lasting, hence, how important that he who makes them should understand his work.

If the cabinet-maker spoils a board in making a table or chair, another can be supplied; if the slab of marble is ruined by a mis-stroke of the sculptor, the quarry will supply another. But not so with the human soul. Every mistake, every wrong step, every incorrect method leaves a scar on the immortal mind, a defect, perhaps not to be eradicated by the lapse of eternity. If what is taught is to be retained through eternity—if knowledge is *eternal*—how important that good impressions be made and well made.

It is the special object of this department to train the student how to mould, and how to teach naturally. First, the theory will be taught by a course of lectures, and afterward put to practice in the model classes, where students teach the *children*, and are afterwards criticised by the students and principal.

The first year of the Teachers' Course is intended to fit teachers fully and thoroughly for the work of the country schools. Pupils coming in from country schools will be trained in those branches upon which they are examined, and which they are required to teach, as well as those methods and devices which will make our country schools exceedingly pleasant and profitable places. The most rigid and satisfactory drills in Orthography, English Grammar, Analysis of Sentences, Letter-Writing, Arithmetic,

Algebra, Map-Drawing, Teaching, Alphabet, Elocution, and Physiology, as well as in the Theory and Practice of Teaching will be given each term.

Those who will complete the entire course thoroughly, will be amply qualified to take charge of any graded school, and if they have any tact whatever, cannot help but succeed.

SCIENTIFIC COURSE.

There are many persons whose time and means are both limited, and who desire to become acquainted with nature and her harmonious laws, but care nothing about Latin and Greek roots and derivatives farther than what they can obtain from a good unabridged dictionary and an ordinary English grammar. For such the Scientific Course is intended.

CLASSICAL COURSE.

The Classical Course includes the Scientific, Teachers' and Commercial Courses; but those completing the Classical Course, and not intending to make teaching a profession need not enter the Teachers' drill classes nor devote so much time in reviewing the common branches. The instruction in this course is intended to awaken thought, and make each member of every class efficient and self-reliant, practical as well as theoretical. It is sufficiently extensive for all ordinary purposes. Should any, however, desire a more extensive course in Latin and Greek than is found in our curriculum, arrangements have been made to accommodate them.

MODERN LANGUAGES.

There are many who desire to study German and French. Although we have not published a course of studies in those languages in our curriculum, yet we form classes in them when it is desired. Prof. F. Maglott has charge of the German classes, and Mr. C. L. Rose of the classes in French. They are not only competent to teach the construction of these languages, but also the proper pronunciation.

CIVIL ENGINEERING DEPARTMENT.

COURSE OF STUDY—FIRST TERM:

Practical Arithmetic, Grammar, Geography, Free Hand Drawing.

SECOND TERM:

Higher Arithmetic, Algebra, Physical Geography, English Composition, Drawing.

THIRD TERM:

Algebra, Geometry, Rhetoric, Drawing.

FOURTH TERM:

Algebra, Geometry, Trigonometry, Physics.

FIFTH TERM:

Analytical Geometry, Land Surveying, Astronomy, Shades, Shadows and Perspective.

SIXTH TERM:

Civil Engineering, Railroad Surveying, Calculus, Bridge Building.

In Civil Engineering the instruction consists in class recitation, field work and drafting.

The course of study includes the following: Surveying—Compass and Transit, Grading, Leveling for Ditches and Drains, Pikes, Rail Road work, including Curves, Cross Section and Plans and Specifications. A Profile or Plat of all work is required of each student.

Each student has the opportunity to get acquainted with the use of the various instruments used in surveying and engineering. The subjects of bridge building, strength of materials, structures, drainage, and drawing are made specialties both in the classroom and in actual practice.

MECHANICAL, ENGINEERING AND ARCHITECTURAL DRAWING.

Mechanical drawings, such as timber joints, machinery, &c., engineering work as cofferdams, stone, wooden and iron bridges, &c. Architectural drawings, as plans, and elevations of buildings with their appropriate coloring and lettering, will be taught as the individual wants of the student require.

 A number of our students have been employed as Civil Engineers at good salaries ranging at from \$100 to \$200 per month.

Any one completing the above course will be awarded a diploma, which will entitle him to the degree of B. C. E.

COMMERCIAL DEPARTMENT.

In making our announcements for this department, we shall endeavor, as far as possible, to refrain from making any statements that we cannot substantiate.

We do not believe in the modern practice of many institutions, of making glowing statements about furnishing students with situations on completing a course of instruction, or of dressing up the columns of some College Journal with flashy pictures, representing the interior of some large and finely furnished room, &c., in order to receive patronage, for it is frequently the case that upon going to some of these institutions, things are found far from being as represented in the advertisement.

In this day and age, when journalism commands such a wonderful influence, it is not at all surprising that its assistance is sought for unworthy as well as worthy purposes. And, as people are influenced more or less by what they read, many things are advertised and sold on the strength of the advertisements, that are far from being as represented.

It is not our intention to deceive by making statements to the public, but to offer such a curriculum of the commercial science that will meet the approval of all the ardent friends of the study, and to carry out to the letter what we advertise.

We have aimed to make our course as extensive as that found in the best commercial colleges, and to those who contemplate taking a Commercial Course, we only ask you to give us a fair trial, and we will leave you to judge as to the thoroughness of the course and our ability as instructors.

COURSE OF STUDY.

The following branches are included in the Course of Study, viz: Book-Keeping, both by Single and Double Entry, including Mercantile, Private and National Banking, Railroadings, Joint Accounts, General Partnership, Commission, Storage, Commercial Calculations, &c., with their collateral branches in Penmanship and Commercial Correspondence, Railroadings and Banking.

TUITION.

For the full Course of Study, including Banking and Railroadings, Business and Penmanship, time unlimited, \$20.00. This offer is made only to those taking the regular Commercial Course.

Those who take any Literary Studies will not be charged extra tuition for Book-Keeping and Business Penmanship.

WHEN TO ENTER.

Students can enter at any time while school is in session and remain until the course is completed. Students are not put into classes, but each one receives individual instruction, hence, he is not hurried, in order to keep up with others brighter than himself, or detained by those less gifted, but he is allowed his own time, and receives assistance from the teacher when needed.

TIME REQUIRED.

While we insist that the student should practice economy as much as possible, yet we allow nothing in the course to be omitted, in order to hasten graduation. Such a course will not only prove injurious to the student, but will finally prove to be an injury to the institution giving it. It would be impossible to state a time in which all could complete a course of instruction, because some learn more readily than others; also much depends upon the student's industry. Persons of ordinary ability and, having a good common school education can, by close study of from six to eight hours per day, complete our course of study in four months, but those who are very deficient in penmanship and arithmetic, will be obliged to extend the time to six months. Some, perhaps, can complete it sooner, but this is about the average time required.

EXAMINATIONS.

Upon closing each set of books, the student is required to write out a statement of the same, and his work is carefully examined by the teacher as far as he has gone, and upon the completion of the entire course of study, he is required to pass a rigid written examination conducted by the instructors of the Commercial department. This examination covers the entire course of study. In case this examination reveals deficiency, he is required to return and perfect himself in what he may be found wanting. No diplomas will be granted until the student passes the requisite examination.

It may seem to some that our final examination is too extensive, but to those persons we wish to say, that we deem it our duty, as an institution, to have the student thoroughly understand what he does. We believe it to be to the student's best interest.

COMMERCIAL FORMS.

We bestow much care and labor upon this part of the Commercial course. We give special lessons on the best forms of Business Letters, Drafts, Checks, Promissory Notes, Bills of exchange, Receipts, Bill of Lading, Due Bills, Account Sales, Account Current, Bills of Sale, Invoices, &c.

Lessons are given daily, before all classes by the instructor of the Commercial department, for five weeks of each term. After each lesson is given, the pupils are required to write up each form, and before leaving the recitation each one's work is carefully examined and corrected by the teacher.

The student receives individual instruction upon this subject, as well as class instruction. The subject is not given in a wholesale manner, but each particular part of all that pertains to these forms, is discussed separately.

 In order to obtain a diploma in Commercial Science, a thorough knowledge of grammar and rhetoric is required.

PENMANSHIP.

To prove the necessity and value of penmanship as a practical art, needs no argument. The truth of the old axiom, "The noblest acquisition of mankind is speech, and the most useful art is writing," is too plain to admit of any doubt. For the person seeking a position among business men, a good handwriting is often the stepping-stone to success. In short it is an indispensable aid to any person, whatever his position in society may be.

For the past four years, the institution has met with marked success in this department under the management and teaching of Prof. J. H. Baldwin. It shall be our aim to make it more successful in the future than in the past.

Both plain and ornamental penmanship are taught on theoretical and scientific principles. We bestow an untiring effort upon all of our students in this department. While students are divided into classes, yet at the same time, each one receives individual instruction. Lessons are given daily before all the classes in the writing department. We do not only pay special attention to the analysis of letters, spacing, slant, shading movement, &c., but also to the correction of errors and the best methods of avoiding them.

No engraved copies are used in order to lessen the labor of the teacher, but copies are written by himself in the presence of the pupils, and their writing carefully examined by him and the errors of each one pointed out and corrected. Learning to write from engraved copy lines is more difficult and requires more time than learning under an experienced teacher, because it must be remembered that no rule can be learned from an engraved copy except that only of similarity. The pupil does not learn to apply principles, but merely to copy. Take away his copy, and he has only the memory of forms to guide him, and if he fails in this, he fails in his art because he has not learned the science. Another advantage which the pupil of penmanship gains by writing copies and individual instruction is in regard to movement. He may be told all about how a certain movement is to be made, and what kind is necessary in making a certain letter or exercise, but he fails to grasp the correct idea until he sees it put to practice by the living teacher. By seeing it made he forms a more correct idea of the execution of the whole form. He sees in what positions the hand must move in order to give each line the proper slant, shade, space, &c. In short, he learns more of the science, and how to put it into practice under the supervision and assistance of the teacher.

ORNAMENTAL PENMANSHIP.

In order to accommodate those who desire to learn Ornamental Penmanship for the purpose of teaching it, or as an accomplishment, we devote special attention to it. The course embraces business and epistolary writing, flourishing, Old English and German text, pearl lettering, pen drawing, pen shade, stipple work and the different varieties of fancy lettering and ornamental script.

STENOGRAPHY, OR SHORT HAND WRITING.

To better our condition in life, is a most worthy motive. Young men and women should seek those openings in which success is promised. The question then arises, which are the most promising callings or pursuits which are now open to our young people? The "learned professions" seem crowded. We have lawyers, physicians, and ministers enough and to spare, and these professions require time, money and study. But a new field has lately been opened—a field which promises liberal returns to the well qualified. It is Stenography. This is a calling not likely to be crowded, and there must continue to be a greater demand than supply. In this age of progress, when time is practically out-witted by the wonderful achievements of steam and electricity, as exhibited in the locomotive and telegraph, a swifter means of writing is necessary and we find it in stenography. Business men are taking advantage of its aid in conducting a large correspondence. The demand for capable reporters and amanuenses is constantly increasing, and who is qualified need not fear of securing a good paying position. The qualifications for the study are only an ordinary, common school education, and the art may be attained as easily as reading, writing or arithmetic. It may not be amiss to give a hasty survey of the field to which this art is adapted. It is a labor-saving system of writing for the lecture-room, the practical use of teachers, editors, lawyers, ministers and students, for literary composition, correspondence, book-keeping, making memoranda, quotations from books, and in a thousand ways saving in time and labor, besides being a money-making profession. One term of ten weeks is sufficient to give one a thorough knowledge of the corresponding style which is the germ of the reporting style. Another term of ten weeks will give the pupil a fair knowledge of the principles of the reporting style. Terms for instruction in either style of the art, \$5 for 10 weeks.

For further information, inquire of S. P. AXLINE, Ada, Ohio.

TELEGRAPHY.

This department was only opened in August, 1881; although not a year old yet, has met with good success, its pupils succeeding well. A large proportion of those first entering it are now employed in telegraph offices on different railroad lines. It is under the management of an operator in the employ of the P. Ft. W. & C. R. R. All strictly temperate and steady young men who attend this department and desire it will be furnished places in the offices of this line to finish up so that when they have completed our full course they are competent to fill any ordinary railroad telegraph office. Our full course combines school with railroad office, thus enabling our pupils to get started in the business in one-third to one-half the time required to do so by commencing in an office at first, giving them just the same assurance of situations, when competent, that they have in that way. This arrangement gives this department advantages over other schools. The Superintendent of Telegraphy will use our students whenever he has vacancies, and they are competent. He is always in need of good, steady operators. We do not pretend to guarantee situations, but we do carry out all our promises. Our school room course is the same as any telegraph school. For particulars address

P. W. REAM, Ada, Ohio.

FINE ART DEPARTMENT.

DRAWING.

This is a new feature of the institution, which has lately been introduced. The art of drawing and sketching is almost indispensable to success in primary teaching. It is the same to the teacher of natural history. In fact, drawing, sketching and drafting are not only accomplishments, but are useful in nearly every calling in life. Drawing and painting educate the hand and eye, cultivate a love of the beautiful, and refine our natures. Since drawing has taken so important a place in our city schools, the demand for teachers who can impart instruction in this branch has been great.

Arrangements have been completed that place this department of our school second to none in the State. Miss Gertrude Fryett, who is an artist by nature and especially so by preparation, has been procured to take charge of this department. She does not only understand *what* she teaches, but understands *how* to teach.

The instruction will be mainly on the European plan, where distance and direction is estimated by the eye, and the drawing strictly free hand:—but sufficient liberty will be allowed in the use of instruments to make the recitations pleasant and profitable.

Special care will be taken at the start, that the student lays a foundation for future excellence, by being as accurate as may be in the delineation of objects; and the practice so common of hurrying over work carelessly will not be allowed. As the formation of a class where all can take the same kind and amount of work is manifestly impossible, considerable liberty will be allowed the student in the selection of particular drawings he wishes to make; but his progress will depend largely on the time he devotes to the work and his aptitude in taking it up. After the student acquires sufficient accuracy in copying *pictures* he will then be allowed to draw from plaster cast models in stump and India ink. This affords the very best exercise the student can take up for acquiring facility in reading and rendering shades, and as this enters so extensively into portrait painting and landscape drawing, its importance must not be overlooked.

SKETCHES FROM NATURE.

The next step will be to sketch natural objects. Quite a number will be provided that may be drawn in the room; but trees, horses, farm buildings, animals and landscapes will furnish abundant material for practice.

OIL PAINTING.

Painting is considered, at the present day, as necessary an accomplishment as music. Besides the cultivation of a taste and appreciation of the beautiful, which a knowledge of the art creates, it opens the eye to form and color as nothing else can. Within much less time and at much less expense, any one of moderate ability can become a fairer painter than a fair performer on the piano-forte. There will be three lessons a week in portrait painting, that those taking drawing and other studies may have an opportunity to cultivate this beautiful art. The studies will be from life, from other pictures, and from the photograph. Landscape painting, and painting flowers in water colors, will also receive due attention.

FLOWER AND LANDSCAPE PAINTING.

Our arrangements for landscape and flower painting are complete. Copies are furnished, or pupils may select copies from which they like to work.

CRAYON DRAWING.

There is always a demand for crayon artists. The few materials, the ease and rapidity with which crayon work can be executed, and the comparatively short time required to learn it, are considerations that lead many to prefer it to oil painting.

FANCY WORK.

"A thing of beauty is a joy forever." The proper cultivation of a love for the beautiful is both refining and elevating, and many young ladies desire to include something

under the above head in their course of studies. To all such we take pleasure in announcing that Mrs. A. Ingalls will give instructions in zephyr and wax work. Each pupil will be entitled to keep her own work, which of itself is usually worth more than the cost of instructions. Terms, \$5.00 for either zephyr or wax work.

SPECIAL ELOCUTION.

In order that the study of Elocution may receive the attention which the subject merits, in addition to the free classes taught every term, the services of Prof. S. S. Hamill, of Chicago, have been engaged to take charge of the "Special Department of Elocution" connected with our Institution. Many students wish to make the study of elocution a specialty and nowhere are better opportunities offered than here. Prof. S. S. Hamill is one of the most thorough and accomplished elocutionists in the United States, and as an instructor has few equals. He is not simply a mimic but a master of his art. Further he is a Christian gentleman. For other information inquire of

H. S. LEHR, Principal.

MUSIC DEPARTMENT.

On account of the increased demands for a more comprehensive and thorough course in this branch, the Faculty have been necessitated to make this a special department, affording all the advantages to be had in a regular conservatory, and at a cost much less than is charged in music schools. The plan of teaching consists both of private lessons and the conservatory or class system, which is now so universally adopted by all our best musical institutions. To those taking music in connection with studies in the Literary Department, from one to two lessons per week will be given as may be desired, and they will be expected to practice not less than two hours per day. Those desiring can practice from four to six hours per day. We would advise all who can to bring their instruments with them.

PRIVATE AND CLASS SYSTEM.

Private lessons are made a specialty, although the class system is much in favor and would be more so if pupils understood its advantages more fully. Each pupil has the benefit of the entire hour. Instruction to one is instruction to all. The benefit of the practice, the correction and explanation is enjoyed by all. The illustrations, criticisms and approval are seen and heard by all, and pupils are thus accustomed, from the beginning, to play or sing in presence of others. Pupils desiring this form of instruction can be accommodated, and classes will be formed of two, three or four, as pupils may wish. In private lessons the pupil has the benefit of the teacher's entire time and attention during the lesson. The time of each lesson is from 30 to 45 minutes. Instruction is given in Piano-Forte, Cabinet Organ, Church Organ, Violin, Flute, Cornet, and all other Orchestral and Band Instruments, Thorough Bass, Harmony, Vocal Culture, Chorus and Solo Singing and all other branches necessary to complete a musical education.

REGULAR COURSE OF STUDY.

It is desirable that pupils in this department should so study as to become thorough, well balanced musicians. As the course of study pursued in our literary department is intended to give a knowledge, not only of language, mathematics, or any one branch of science, but such a comprehension of them all as will give a basis for complete practical education, so in this department it is the aim to give each student an acquaintance not with piano-forte, organ, singing, or theory alone, but such a knowledge of all as will form a basis for a complete musical education. To those desiring a thorough knowledge of music in the shortest possible time, we recommend a regular course of study which shall consist of Rudiments, Thorough Bass, Harmony and Composition, Singing, Piano and Organ, whichever the student prefers.

PIANO-FORTE.

This department is under the direction of Mr. F. R. Webb and Mrs. C. E. Rowley. Mr. Webb enjoys quite an extended reputation as a musician and composer, and brings

to his aid the benefit of the highest educational facilities combined with years of experience, as also does Mrs. Rowley. This department is divided into two courses—a short parlor course of about two years, and a regular classical course of four years, which is divided into five grades and embraces as many of the principal works of the great masters as it is possible to study thoroughly and correctly in the time allotted. This course embraces the following standard works or selections therefrom: The New England Conservatory method for 1st, 2nd and 3rd grades; Lebert & Stark's Piano School—books 1, 2 and 3 complete; Plaids's Technique; Selections from the studies of Kohler, Durenvoy, Czerny, Bertini, Cramer, Heller and others. The Sonatas of Clementi, Kuhlau, Dussek, Haydn, Mozart and Beethoven. Selections from the works of Mendelssohn, Chopin, Shumann, Schubert, Von Weber and others, and pieces by standard, modern and classical composers. We strongly urge pupils to choose this course. The short parlor course is devised for the benefit of those who cannot spend the time and means for the regular classical course, and embraces three grades, with selections from the following standard works or their equivalents: Plaids's Techniques, Kohler's op. 50, Loschhorn's op. 65, Durenvoy's op. 120, Loschhorn's op. 66, Czerny's Velocity op. 299, Bertini's op. 23 and 42, etc., etc., together with selections from Clementi, Kuhlau, Mozart and others, and suitable pieces by standard composers. Pupils are required to practice from two to four hours per day, according to their grade. This rule will be rigidly enforced, and pupils who will not practice will not be retained.

THE PIPE ORGAN.

This department is under the direction of Mr. F. R. Webb, organist of Trinity church, Lima, whose reputation as an organist is quite extended. A thorough course is laid down, including selections from Rink's and Lemmen's organ schools; selections from the organ works of Bach, Mendelssohn, Ritter, Richter, Best, Smart, Buck, Whitney, Botiste, Welz, and others, including studies on registration, the playing of church music and all that is necessary to give one a mastery over the organ for church or concert use. Pedal organs are provided for pupils. Advanced pupils can have the limited use of the large pipe organ in Trinity church, Lima. Frequent recitals are given by Mr. Webb on this organ, to which pupils are admitted free. Pupils are advised not to begin the study of the pipe organ until they have reached grade three in the piano course, as a certain amount of execution and musical knowledge is indispensably necessary to the organ student, and can be acquired much easier and cheaper on the piano than directly on the organ. A knowledge of Harmony is also an indispensable auxiliary and should be taken up from the beginning.

RUDIMENTAL CLASS.

In this class is taught a complete knowledge of all signs and characters used in written music. Practical exercises are given with the above which will enable the pupils to so comprehend the subject that they can read ordinary music at sight within one term's instruction.

CHORUS CLASS.

This class will be free to all music students that take one of the four courses. Pupils in this class will be expected to read ordinary music at sight. The choruses used will comprise selections from the old standard authors and modern writers, together with instruction in voicing, phrasing, intonation and enunciation.

ORATORIO AND OPERA CHORUS.

This class is formed to supply a long felt need. It enables pupils that are advanced to study and enjoy those master works which cannot be executed by amateurs. Each year there will be given an oratorio and opera by the members of the school that are far enough advanced in the science to read and comprehend classical music.

NORMAL CLASS.

This class is intended for those desiring to teach. Each member in turn will be required to give instruction in his department, and each lesson will be subject to kindly criticism.

HARMONY AND THOROUGH BASS.

The theory department is entirely under the supervision of Mr. J. J. Jelley, who has made the subject a specialty and is prepared to interest all that desire to acquaint themselves with this important branch. The theory of music has been, in the past, sadly neglected not only by amateurs, but the profession has not given it the attention which their work calls for. Harmony is a delightful study and when understood so that the pupil can analyze any composition, it then becomes the most interesting subject of the whole realm of music. Harmony teaches the order of intervals found in the different scales; Triads with their classifications, position together with their inversion and the correct figuring of all chords. The following works are used in this department: Dr. Root's Normal hand book, Palmer's Theory, Richter's Manual of Harmony, Mark's Musical Composition and Weitzman's Theory.

VOCAL CULTURE.

The full development of the voice is considered one of the rare accomplishments. No other particular branch will interest and please the masses, as the lady or gentleman that sings well. The power of song can not be estimated. It is God's free gift to all mankind. Although a natural power it requires development, and can be molded in a perfectly full, round, clear, symmetrical form. Many voices possess power, force and character to become fine singers, but by improper treatment are injured, and in many cases forever lost, whereas if the proper method had been adopted and pursued, they could have been an ornament to the church, Sabbath school, social circle and the concert hall. The best methods are used in teaching vocal culture, such as will give control and flexibility to the voice, that will lay the foundation for a clear, pure and artistic style of singing.

CABINET ORGAN.

In this department the standard methods will be used and the course made as systematic as it is possible for us to accomplish with the capacity of the instrument. The instruction comprises technical exercises such as will enable the performer to play church music, easy voluntaries and interludes preparing the pupil for the study of either piano or church organ.

VIOLIN AND ORCHESTRAL INSTRUCTIONS.

The violin is the leading instrument of the orchestra and undoubtedly the most intricate and one that requires more skill to become an artistic performer than any other known instrument; so much so that it has been christened the "King of Instruments." Instruction will be given to those who wish to study Cornet, Flute, Piccolo, Clarinet and other orchestral instruments. The best methods will be used in teaching the above instruments.

DIPLOMAS.

A completion of the above courses as laid down will entitle the pupil to a diploma but the pupil to be admitted to the Senior Class must have his or her application signed by all the Musical Faculty and handed to the President of the institution before the beginning of the Spring term of school. The graduate of the Theory department will be expected to have an original composition and have it performed on Commencement day. The pupil graduating in Piano will be required to execute one of the sonatas of the old Masters. The vocal graduate will render a selection as given by the teacher of voice.

ENGLISH GRAMMAR.

The department of English Grammar and Analysis is under the special charge of Prof. J. G. Park. No one ever studies this subject under his instruction without falling in love with the same. He is a thorough grammarian and a *live* teacher. His plan of conducting recitations in Grammar calls forth the hearty approval of all his students. Analysis is taught as a separate study and not in connection with the grammar class, thereby giving one hour each day to this important study. From one thousand to two thousand different sentences are analyzed each term by members of the class, an item of

great importance to those who desire to be applicants for certificates before a county board of examiners. In his teaching he is not bound by the shackles of any particular text-book, but uses Harvey's grammar and Greene's analysis as class books. There are usually five classes in Grammar, one for the preparatory class, one for those who have studied it to some extent, and a review class for those who are well versed in the science but want a special drill in the technicalities, such as infinitives, participles, relatives, the proper use of prepositions, etc., and two in Analysis.

CLASS WORK IN ARITHMETIC.

The leading aim in bringing our pupils in the recitation room, is to aid them in doing what they cannot do so well without a teacher. The teacher who is honest, and has a keen sense of his responsibility, dares not for one moment cover up difficulties when the proper time has come to present them. It is not difficult for a teacher to make his pupils *believe* that they already grasp a subject, when in reality they have not the first principles. How many of us have been delighted with the belief that when we had solved all the problems in our arithmetics we were good arithmeticians. Frequently we hear students say, "we now think we know little or nothing about arithmetic," but after a term's drill by efficient teachers they say they now see arithmetic as they never saw it before.

The class drill consists largely in the application of fundamental principles to the solution of problems, and in these *solutions* we are able to draw from the pupil his difficulties and his weakness. Concerning his part of the class work, we offer the following hints:—

Five things should be kept constantly in view, viz: 1. *Exactness*. 2. *Comprehensiveness*. 3. *Clearness*. 4. *Neatness*. 5. *Brevity*. We have not space to speak of them in detail. Exactness is an acquirement that is always necessary to success in every department of active life, and this habit, if habit it may be called, can be learned in the arithmetic class so thoroughly that it follows the pupil in every detail of his life. The pupil should not be allowed to let one single statement remain on the board, or on paper, that is not strictly true. To illustrate:—A has \$20 and B has \$5 more than A; how much has B? $\$20 = A's + \$5 = \$25 = B's$. The pupil means this right, but what is *written* is *false*. These *false* statements are often made in favor of Brevity, at the expense of the Exactness.

A solution should be sufficiently comprehensive to embrace all the points in the condition of the problem. It should be full enough to make all important points *clear*. This will require *close connection* between all steps of the solution. No link should be omitted, for this cultivates the habit of looseness, and is done in the favor of Brevity. We illustrate by this example:—A wool merchant receives a commission of \$40 for buying wool, on a commission of 2%; how much did he spend for wool?

1. $100\% = \text{value of the wool,}$
2. $2\% = \text{commission.}$
3. $\$40 = \text{commission.}$
4. $1\% = \frac{1}{2}\% \text{ of } \$40 = \$20.$
5. $100\% = 100 \text{ times } \$20 = \$2000.$

This solution is deficient; connection is broken at the fourth step. How does it come that $1\% = \frac{1}{2}\%$ of \$40? It cannot be unless $2\% = \$40$, which equation we know to be true, from the second and third steps. Hence the equation $2\% = \$40$, should have been placed between the third and fourth steps, then the solution would have been complete.

The value of *neatness* cannot be over-estimated. If the teacher allows slovenly work done on paper and on the black-board, he is cultivating in his pupils slovenly habits which will work *against* them during their whole lives. In brief, let us say that the arithmetic class should be so conducted as to cultivate good habits of thought and action—that the teacher should look further than the *answer* to problems—that he should look to the life that his pupils must live. He should teach pupils to *think*, rather than to *remember*, to *work* by a consecutive *line of thought* rather than by an *imitation of process laid down in stereotyped rules*.

COMMERCIAL SCIENCE.

Let the young learn what they will use when they grow older. A business education will be a benefit to every person, whatever his future occupation may be. To the farmer

it will teach business habits and attention to accounts, which will give him interest and success. To the mechanic it will teach order, system, management, the practical value of book-keeping, and remedy many deficiencies. To the professional man it will afford clearer insight into practical operations of business affairs, and give him facilities in obtaining practice. Many people who claim a liberal education, do not know how to "open a set of books," or keep a correct, legible cash account, while but a few are able to write a promissory note or draft. Students will be drilled in the principal and auxiliary books, also banking, partnership and joint stock accounts. Mercantile forms and commercial papers will be written and critically discussed.

RHETORIC.

Rhetoric is taught, not as an end in itself, but as a means for the more effective expression of thought, and a more intelligent application of what is good in literature. Step by step the student is guided in the appreciation of principles learned, until a foundation is laid for the independent judgment of his own work and that of others. Exercises in the qualities of style and in the various forms of composition are given by means of original productions, and criticisms. Essay writing is thus not a bugbear, but as natural an illustration of rules as are the problems in mathematics. The classroom is not a place simply for the repetition of what is found in the text-book, but for inquiry and discussion.

Special attention is paid to versification, and, through the entire work, to punctuation and capitals.

CHEMISTRY.

Prof. M. Jay Ewing, an earnest and efficient teacher, has charge of the Department of the Sciences. With the additional apparatus and the conveniences afforded for philosophical experiments and work in the chemical laboratory we offer our patrons superior advantages.

Students in chemistry are required to pay a small sum to cover expenses of chemicals used in experimenting.

BOTANY.

Character is the aggregate of love. He who loves much and deep, if his love be centered in the pure and good, has a character as strong and abiding as eternity.

If I love all that is spotless, all that is virtuous, then my soul is attuned to the music of the universe, and my heart beats in harmony with the Great Heart of Heavens.

To love flowers "naturally" is a rich gift, but to learn to love them is an accomplishment which becomes a virtue, the worth of which cannot be estimated. When we learn to love flowers they become our companions, companions whose breath fills our air with sweet and delightful perfumes, rich in suggestions of a higher life. Companions, who leaving us, leave us better.

"To me, the meanest flower that blows can give
Thoughts that do often lie too deep for tears."

The student of botany finds one of his sweetest and purest joys in looking forward to the Springtime, when Nature with her ethereal keys, with no jar of bolts, or clank of chain, turns the intricate wards, unlocks the world of ice and sweetly whispers "the time for the singing of birds is come,"—"behold the lilies of the field."

The study of botany yields a rich harvest of useful knowledge too. Useful to every man who tills the soil, because he knows more of the laws of plant life and growth. Useful to the teacher, because he can turn from the monotony of routine work and engage in the most intensely interesting and profitable discussion of plants, concerning their habits, their laws of growth, their beauty and their use. Useful to the public speaker, because it is to him an inexhaustible source of illustration. Our aim in teaching this subject is to give the student all these benefits as far as possible.

Great pains are taken with the technicalities of the subject, thus preparing the pupil for successful investigation in the field. As soon as the flowers come the pupil goes to the

woods, and there applies his technical knowledge to the investigation of plants as he finds them in Nature.

Our pupils usually analyze and write out a description of from one hundred to one hundred and twenty-five plants, each. This may seem a hard task, but it is universally true that this exercise is the student's most delightful recreation. It is a race with the members of the class to see who will reach one hundred plants first. The study is calculated most decidedly to cultivate the following:

1. Exactness in defining and describing.
 2. A love of Nature.
 3. A keen and penetrating observation.
- All of which have much to do in making the true scholar.

RECITATIONS.

Each class has a recitation of sixty minutes, giving a short review of the preceding lesson and reciting the lesson of the day. The subjects and topics are assigned at the previous recitation, giving ample time for full investigation and thought, which will be produced the next day in discussion of principles.

LECTURES.

In addition to the class lectures on special topics in each department, students have the opportunity from time to time to hear the most distinguished lecturers of the country, under the auspices of The Union Lecture Association, conducted by the three Literary Societies. These lectures are divided into three courses—three lectures each term. During the past year lecturers on the course have been—Rev. Buck, Lima, N. Y.; Dr. Scott, President Ohio State University, Columbus, Ohio; Major Dane, Boston, Mass.; Dr. James Hedley, Rochester, N. Y.; Mrs. Ann Eliza Young, Battle Creek, Mich.; Dr. T. Dewitt Talmage, Brooklyn, N. Y.; Hon. Wm. Parsons, Dublin, Ireland; Hon. George R. Wendling, Bloomington, Ill.; Rev. Dr. Thomas, Chicago, Ill. Lecturers for the coming year have not yet been secured, but the Association will secure the best in the field.

BOOKS.

The school is well supplied with reading matter. Each of the Societies has a large library of well selected books to which the respective members have access. Besides these the Institution has text-books and works on Pedagogy, to rent at from 10 to 25 cents a volume, per term. In descriptive geography, we have the Eclectic; in physical, Houston's; in arithmetic, Ray's, Stoddard's, White's, etc., etc. Yet we would advise all to bring all the text-books along with them which they possess on the various branches which they may desire to study.

SCHOOL YEAR.

The school year has been so divided as to accommodate all parties. Both ladies and gentlemen who may want to teach a term can do so and yet get the benefit of four terms a year, as much time as is usually given at colleges for an entire year. The First Fall Term of ten weeks is designed for the especial benefit of common school teachers, whose means and time are limited, and yet who feel the need of a review of what they must teach, and desire to obtain the best methods of imparting instruction. To experienced teachers, a ten week's term affords ample time for review and drill in arithmetic, grammar, geography, orthography, reading and penmanship. Those who intend to continue in school need not be at any expense of remaining here for a vacation, as the second Fall Term begins at once, and the classes which did not complete their work will continue the next term without reorganization. New classes will be formed to accommodate those requiring them. There is *no vacation* until the holidays, when a vacation

of eight days is granted, which affords ample time for visiting, recreation and rest. Many farmers' sons and daughters will find the Winter Term well adapted to their circumstances. It begins after the farm work is done, and closes by the time the spring work commences. The Spring Term commences just about the time the winter schools close, so that those teachers who wish to attend school can have an opportunity to do so. The Normal Term will hereafter be made a specialty in training teachers. The services of the best lecturers and teachers in the country will be obtained to assist the present able and efficient Faculty. No pains or expense will be spared to make it both profitable and pleasant. A Teachers' Institute will be formed and the most vital points in school government, school organization, school law, methods, etc., will be fully discussed. Papers will be prepared and read by the students and afterwards discussed. Nor will the social interests be forgotten. Man is a social creature, and that department of his nature needs culture and development as well as any other. The Vacation Term of four weeks will be conducted much as the Six Weeks Term.

DISCIPLINE AND MORAL CULTURE.

The government is lenient and parental, yet firm. The moral interests of the students receive special attention. Religious influences are so wielded that all inclination to vice and evil are discountenanced. The different Churches and Sabbath Schools are regularly attended by the students. Each student is required to render cheerful obedience to the few rules that are necessary for the government of the school. Students are not permitted to attend places of public resort which have a tendency to waste their time and money, and corrupt their morals. The teachers are connected with the different religious denominations, which avoids sectarianism, but all work together for the advancement of true Christianity. The students have organized a students' prayer-meeting, which has been the instrument of accomplishing much good. The various Churches and Sabbath Schools of town welcome all to their meetings and exercises, and most of the teachers and officers in the Sabbath Schools are students of the Normal School. The Y. M. C. A., which has recently been organized, has already accomplished much good.

REASONS WHY

The North-Western Ohio Normal School Should be Patronized.

1. Because religion and morality are her foundation principles.
2. Because it is an institution where *any person* can pursue *any study* at *any time*.
3. Because her motto is economy, practicability and thoroughness.
4. Because her teaching is justly normal.
5. Because she seeks the moral and physical welfare of her students.
6. Because she stands on her own merits—not being endowed.
7. Because she trains and selects her own teachers.
8. Because her literary societies are unsurpassed.
9. Because her recitation and study rooms are capacious and pleasant.
10. Because her determination is, not to be surpassed by any other Normal School in the United States in any of the modern conveniences.

MENTAL CULTURE.

It has been the object of those engaged in teaching, by new methods of illustration, to awaken interest, to increase energy, to give confidence, to develop comprehensive thought, and thereby to accumulate power to communicate understandingly what has been taught. Every individual should have opportunities equal to his capacities. Each person is morally accountable for his intellectual qualifications. An institution must keep pace with the age in which we live. It should reach beyond the landmarks of a century ago.

LITERARY CULTURE.

No education is complete without a full literary culture. No institution of learning is truly such without ample facilities for literary drill. The young man or young woman who goes out into active life, without a good literary qualification, is like a ship without a compass. No one has a moral right to be destitute of this culture, because it comes within the means of all. There is no department of education that needs more practice to become efficient and practical than the literary. Hence all will be drilled in composing as a regular school exercise. But for the more general exercises of declaiming and debating there have been organized three model literary societies in connection with the institution—the Franklin, Philomathean and Adelphean—affording excellent opportunities for culture in composition, punctuation, select and original declamations, debate, criticism, and parliamentary usage. Each society has a good library and hall suitable for its meetings. Many of the young students organize private debating clubs for special drills.

REUNIONS.

About every two or three weeks the students congregate in the Literary Halls for the purpose of getting acquainted with each other, and more especially to cultivate their social natures. They spend about three hours in conversation, declamations, music, etc. These reunions afford opportunities for young men and young ladies to increase their colloquial powers, to study human nature, to appear free and easy in society, and generally to smooth and brighten by mental attrition, in the same manner as "steel sharpens steel." These reunions are in charge of one or more members of the Faculty, and are free from low jestings and other vulgar practices, and can be participated in by the most fastidious moralist. Reunions, when well conducted, are elements of success in any school. That man is a social being, is acknowledged by all, and if the young and gay are not allowed to indulge this disposition in a proper way, all the old monastic rules of colleges and convents cannot totally prohibit the indulgence of the same in some way, and in a way which is generally to be deplored, such as is afforded by saloons, card tables and the ball-room.

EXAMINATIONS.

Regular written examinations are sustained every four weeks. All students whose average for the term exceeds 75 per cent, are promoted to the next higher class. Students or parents who desire a full report of the department, scholarship, and class standing, can have the same by calling upon the Secretary of the Faculty.

REMARKS.

All students are expected to be present at Chapel Exercises at 8 30 a. m. every school day morning, unless excused. The institution is free from all sectarian bias. Religious Services and Sabbath Schools are held at the different Churches, and students are warmly invited to attend. No one is admitted as a member of a class without presenting his receipt. No tuition will be refunded except in cases of protracted sickness. Text-books will be rented by the term at from ten to twenty-five cents. Those desiring to buy can obtain them at low rates. No student is permitted to use tobacco within the school building.

DIPLOMAS.

Beautiful and neatly executed diplomas will be awarded to those who complete any one of the regular courses of study. A fee of \$2.00 will be charged for a diploma in the Commercial Course, \$3.00 in the Scientific, Teachers', Civil Engineering and Musical and \$5.00 in the Classical.

HISTORY.

The North-Western Ohio Normal School was formally opened August 14, 1871, for the instruction and training of teachers in the science of education, the art of teaching and the best methods of governing schools. It did not spring into life spontaneously, but was the result of five years' work, (by its founder) in the Union Schools of Ada and series of terms of select school. Hence, the institution is the result of earnest labor, and by the blessing of God it has grown into usefulness, and steadily increased in numbers. It has been in successful operation eleven years, with increased success and is receiving students from all parts of the country. The growth has been steady and rapid, the enrollment the last year has been 1,918; the increase in the enrollment this year over that of last year was 516, or 37 per cent. Although there has been but little advertising, the school has grown more rapidly than any other in the State.

Our buildings are large, of modern style, well furnished and provided with all the modern conveniences for teaching Chemistry and Physics. The literary halls are large and commodious and beautifully finished. The reading rooms and art room are all handsomely furnished. Everything is pleasant and attractive, which adds greatly to the comfort of the students. The school has not grown by flooding the country with *cold-fire* advertisements, but it has grown on account of its intrinsic merits.

In the Fall of 1875 the North-Western Normal School, then located at Fostoria, Seneca County, Ohio, under the management of Prof. J. Fraise Richard, was consolidated and incorporated with the North-Western Ohio Normal School.

TRAINING CLASSES.

Classes are formed for the special instruction of those who intend to prepare themselves for the teacher's duty. The exercises consist of lectures on the mind, school management, essential qualifications of the teacher, best methods of imparting instruction, the ideal teacher, etc.

MODEL CLASS.

Following the instruction in the Normal classes, the model class, composed of a number of pupils from the village, of different ages and stages of advancement, is brought before the Normal class; thus the theories which are given are practically illustrated.

CHARACTERISTICS.

1. The Institution is free from sectarian bias. But it is the constant aim of the teachers to recognize God, not only as revealed in his word, but also in his works. To point out to the student, whenever the opportunity occurs, the wisdom and goodness of God as exhibited in nature. To inculcate lessons of morality, both by precept and example.

2. The Institution is self-sustaining. Not having an endowment fund to rely upon, its teachers are made to feel that success and pay depend upon energetic, earnest, systematic labor. The motto is not "How little can be done in the longest time," but "How much can be well done in the shortest time."

3. The instructors are very accommodating. Kindness is not assumed, it is real. No *scolds* are tolerated.

4. The government peculiar. The teachers accomplish their ends of maintaining the best of order, by putting students upon their own honor and assisting them in their efforts to do right, by parental watchfulness. A student cannot continue in wrong doing and be upheld by his fellow students, or even tolerated in society. The government being based upon reason, and the teachers being kind and accommodating, hazing and other barbaric college tricks are unknown.

5. A leading characteristic is the sociability among the students. True merit and not wealth and fine clothes, is the pass-word for entering into society.

LOCATION.

Ada is located on the great watershed separating the waters of the Mississippi from those flowing into the great lakes. Its elevation above the general level is as high as any other point in the State. The climate is healthy and the water pure. It is a pleasant and thriving village of about 2000 inhabitants situated on the Pittsburgh, Fort Wayne & Chicago railroad, midway between the intersections of the Dayton & Michigan and Lake Erie & Western roads at Lima, and the Indiana, Bloomington & Western road at Forest. It is comparatively free from the evils of aristocracy, and the vices so common in larger towns and cities. Its people are moral, kind and courteous toward the students, and take great pains in making their stay at the Normal both pleasant and profitable.

LAKE ERIE & WESTERN RAILWAY, the Short Line between the East and West, making connection at Bloomington, Ill. and Sandusky, O., and all intermediate points for the North Western Ohio Normal School at Ada, O., 15 miles East of Lima, O. Also the most direct route for St. Louis, Kansas City, Omaha, and all Western points. Direct connection made at Fremont or Sandusky for all Eastern points. Chair cars free to all through passengers. Lower rates for Passengers and Freight are not made by any line. Parties contemplating a trip will do well to call on the local agent, or address,

G. W. SMITH,

O. P. ANDERSON,

General Passenger Agent,

Traveling Passenger Agent,

La Fayette, Ind.

Western Traveling Agent,

Cleveland, Ohio.

Kansas City, Mo.

APPARATUS.

Apparatus, charts, maps, mineral specimens, etc., have been procured for illustrating and exemplifying the various sciences. Among the principal instruments, we have an excellent microscope, with a magnifying power of 650 diameters, a first-class air-pump, electrical machine, galvanic battery, with attachments for electrical analysis, gas generators, with all necessary accompaniments, a good level and transit, etc.

DONATIONS.

All persons interested in the cause of education, and especially in building up an institution of learning in Northwestern Ohio, are kindly invited to make donations of any specimens, geological, mineralogical, zoological, botanical, historical, Indian relics or any curiosity of any value or kind whatever, they may feel disposed to present to the Institution. The names of all donors are preserved in the archives of the Institution.

We solicit our friends to donate to the Institution any mineralogical and geological specimens, animal monstrosities, rare specimens of birds, lizzards, &c. Label the specimens with name of donor and locality.

OUR TEACHERS.

No school can expect to prosper that does not afford the advantages which its patrons demand. One of the first requisites is a thorough, live corps of teachers. We do not hesitate to say that in this respect we afford as good advantages as any Normal School in the land. Each teacher is prepared for his work, and strives to make his recitations profitable and interesting. No one has so much work allotted that he does not have time to prepare himself with a rich fund of knowledge of all that may pertain to his subject. The school is so well classified that each teacher is assigned his special work.

WORTHY OF NOTICE.

1. That many institutions publish very low rates, and in some obscure corner say that students must furnish napkins, towels, carpets, part of the bedding, &c., and as they do not say at what rates these can be had, students coming from a distance will be at the mercy of landlords.

2. Some institutions advertise that they have several thousand students, and yet on a careful examination you find about six regular teachers and three or four auxiliaries. One of two things must be true: either they have "watered" the numbers or have too few teachers for the number of students.

3. Please compare our catalogue with those of other institutions, and then decide for yourselves.

REGULATIONS.

1. Students may enter school at any time.
2. Tuition must be paid in advance.
3. Any one entering for five weeks or less must pay \$1.00 a week tuition.
4. Any one taking the term or year plan can have his board and tuition refunded by paying full rates for time of attendance, but room-rent is not refunded until the room is re-rented.
5. Every student is expected to be a lady or gentleman, and must yield a cheerful obedience to such regulations as may be necessary to protect the morals of the students.
6. Incurable students will be dismissed privately, and will forfeit all they have paid in advance.
7. Those renting books must deposit the value of the books, which is paid back when the books are returned.
8. Receipts for tuition are not transferable.

TESTIMONIAL.

We, the seniors, juniors and other students of the North Western Ohio Normal School, having tested the school in all its departments, cheerfully subscribe our names to the following testimonial:—

The school is indeed as represented, "Thorough, Practical and Economical." The teachers are social, energetic and strong in their respective departments. We do not hesitate to recommend it to all desiring to fit themselves for the other vocations of life as well as for teaching.

RUDIMENTAL.

During the year, over 400 students were enrolled in the Rudimental Singing Class; but as most of them have already been named in some of the other departments of the School, we will omit publishing their names in this place.
